

TAPA-COMPLIANT VIDEO SECURITY

TAPA CERTIFICATION

Many customers in the logistics industry and insurance companies for high-tech goods require certification according to TAPA (Transported Asset Protection Association). Companies in the logistics and transport industry can use this certification to prove that they meet global standards for minimum security requirements.

The camera, recording and software solutions from Dallmeier enable the (over-)fulfilment of the TAPA standards FSR and PSR regarding video surveillance.

- FSR (Facility Security Requirements) for secure storage, warehousing and transport-related interim storage
- PSR (Parking Security Requirements) for secure parking

HIGHEST EFFICIENCY

The unique Dallmeier Panomera® camera technology was developed especially for video surveillance of large areas.

Logistics businesses can use Panomera® cameras to cost-efficiently secure warehouses, loading and shipping areas as well as perimeters and (parking) areas.

DEFINABLE PICTURE QUALITY

Panomera® secures these extensive areas with a precisely defined image quality (DIN EN 62676-4), which is not undercut.

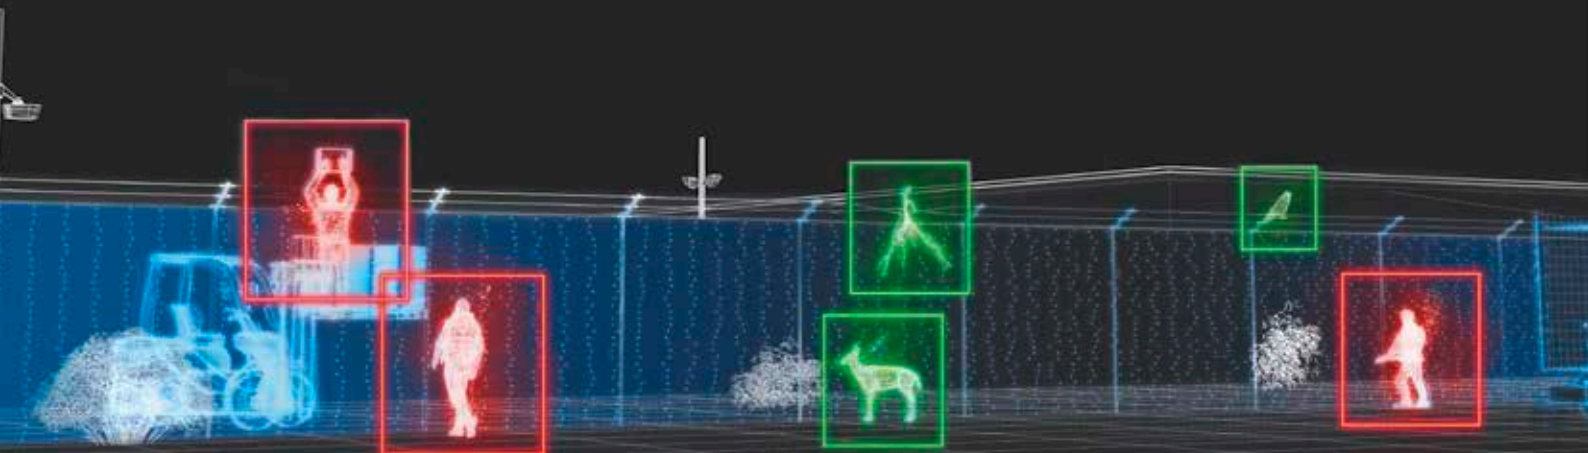

USABILITY IN COURT

This high image quality and the counterfeit-proof nature of the video recordings („LGC Forensics“ certificate) ensure that the video recordings can be used in court and are suitable for criminal prosecution.

This is the prerequisite for efficient protection and investigation in the event of intrusion, goods removal or industrial espionage.

35 YEARS OF EXPERIENCE „MADE IN GERMANY“

Thanks to the high vertical range of manufacture and decades of industry experience, Dallmeier solutions meet the highest industry standards regarding quality, data protection and data security.

Dedicated to quality. Driven by passion.
