

INTELLIGENT* CAMERA ACTIONS

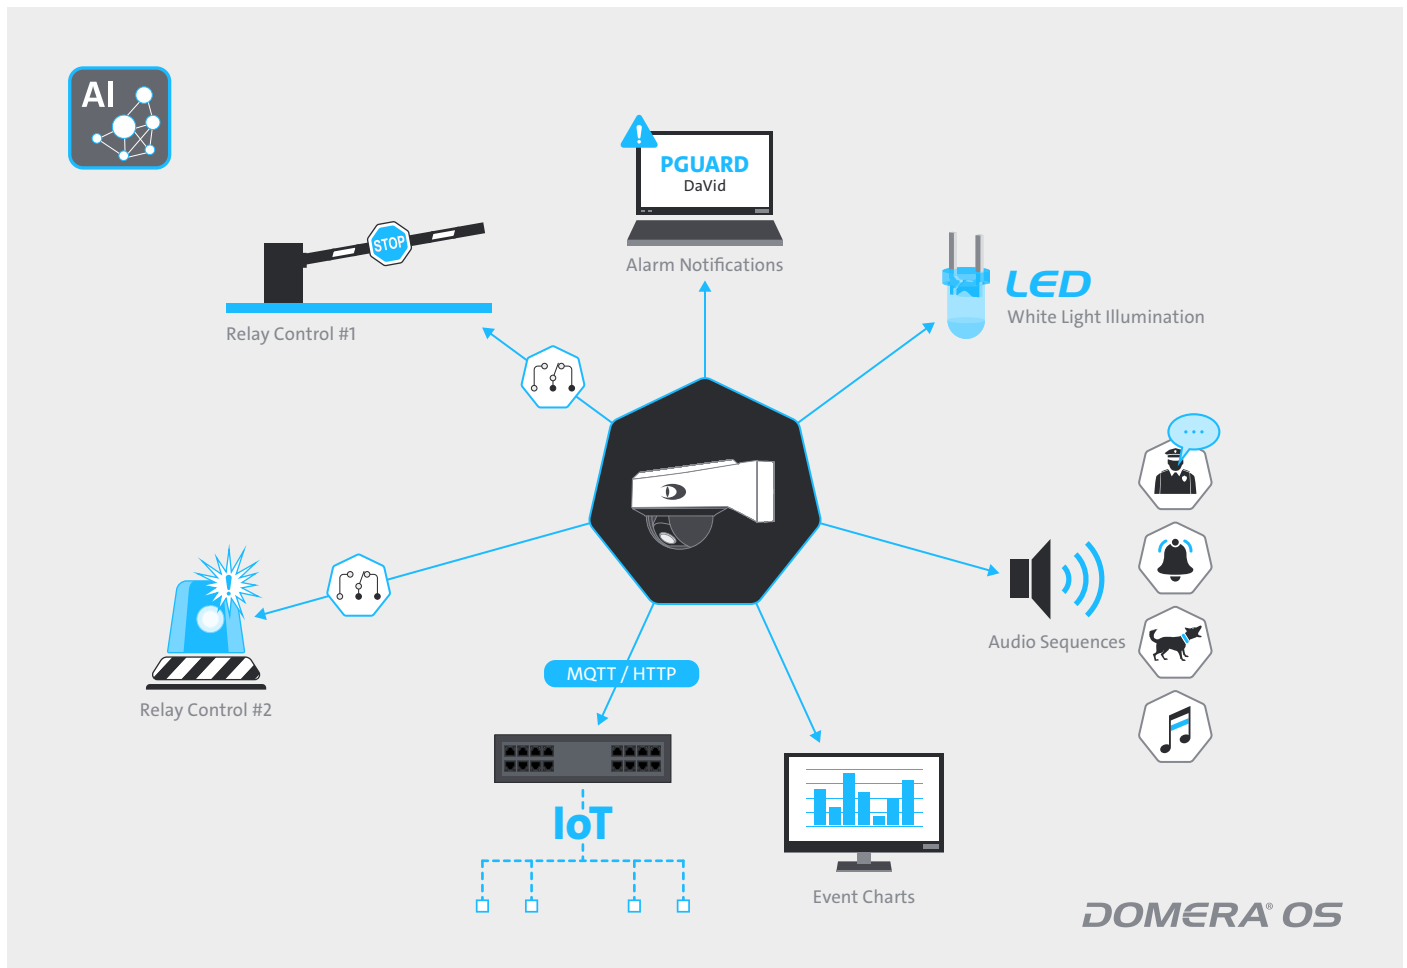

* BASED ON NEW DALLMEIER AI OBJECT DETECTION TECHNOLOGY.

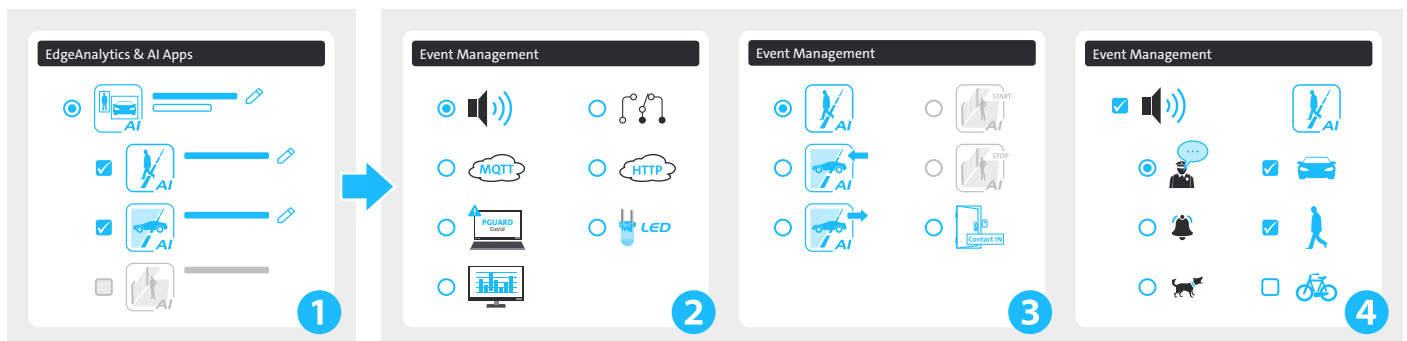

Benefits

- Event-based real-time monitoring and alerting
- Supported by the use of next-generation EdgeAnalytics & AI Apps
- Smart and comprehensive security features
- Powerful hardware output actions
- Simultaneous handling of various action tasks
- Multiple event triggers for each type of action
- Easy integration into small to complex security environments (home, industrial and public)

Schematic Overview

Setting Up Camera Actions Based on EdgeAnalytics & AI Apps

- (1) Enable and customize the global EdgeAnalytics AI Object Detection App along with the required AI applications (e.g., AI Line Crossing App).
- (2) Go to Event management and add a new Event handler of the Action type required (e.g., Audio output).
- (3) Add a new Event trigger (e.g., Line crossed).
- (4) Enable and customize the Action task (e.g., the Audio sequence to be played) and the Trigger elements (e.g., the object classes of interest).
