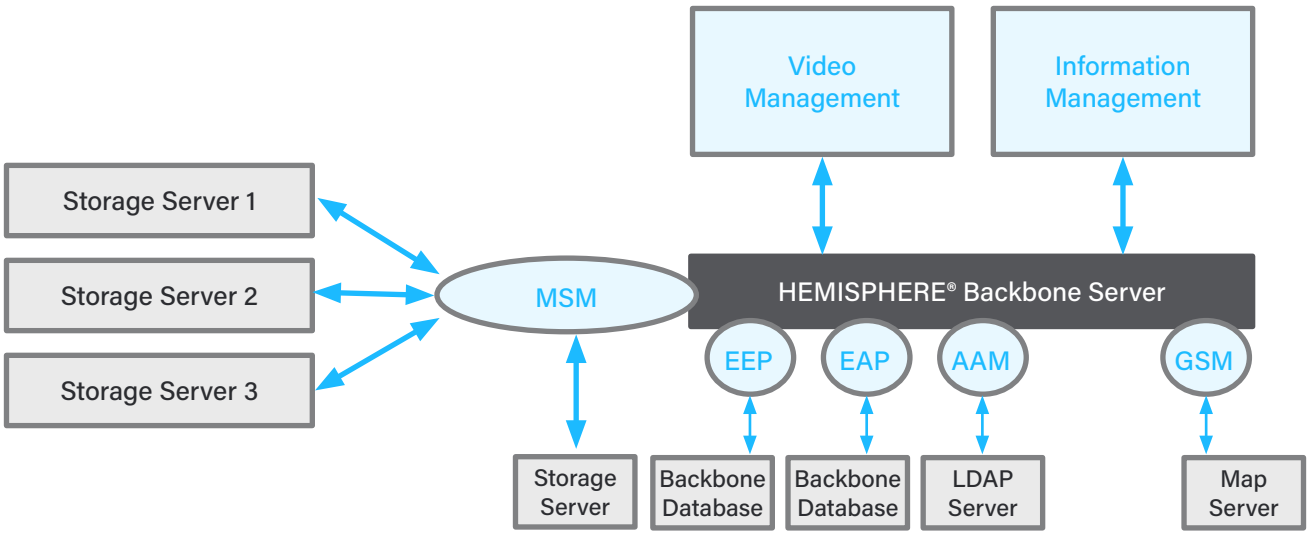
Media Storage Module

HEMISPHERE® MSM Module for the storage, archiving and provision of files, images and videos throughout the HEMISPHERE® system

The HEMISPHERE® Backbone Server Software with its integrated modules forms the central and extremely powerful system for the efficient and rule-based distribution of data as alarm messages, status messages, event messages or authorization information between all components of a HEMISPHERE® Security and Business Management System.



Function

The HEMISPHERE® Media Storage Module (MSM) is a special file management system for storage, archiving and provision of media files throughout the HEMSIPHERE® system. The module is based on a distributed file system and can be connected to a server cluster.

Media Files

The HEMISPHERE® Media Storage Module provides an overview of all stored media files (videos, snapshots or bookmarks), which can be accessed platform independent with a web browser. In addition, the module manages all files that are assigned to an incident as evidence in the HEMISPHERE® Advanced Incident Module.

Security Levels

Saved media files can be subsequently assigned a security level by operators with appropriate permissions. In this way, only operators with the corresponding or higher security level can access the protected files.

Permissions

The classification of operators into a certain security level is done by group permissions in the HEMISPHERE® Advanced Authentication Module. The individual operators are assigned to a special user group, which is then classified into a certain security level.

Configuration

The HEMISPHERE® Media Storage Module provides a graphical user interface for configuration, which can be accessed platform independently with a web browser.

Hardware

The HEMISPHERE® Media Storage Module is installed directly with the HEMISPHERE® Backbone Server Software. A separate server is not required.

Licensing

The license for the HEMISPHERE® Media Storage Module is included in the scope of delivery of the HEMISPHERE® Backbone Server Software.
