

SeMSy® Setup Server Software

HEMISPHERE® SeMSy® Setup Server Software for central configuration of the video system in a HEMISPHERE® Security and Business Management System

The HEMISPHERE® SeMSy® Video Management System combines the proven concept of its predecessors with new dynamics and flexibility. The optimized license model with administration on the central HEMISPHERE® Backbone Server allows a simple, fast and secure adaptation and expansion of the entire system during operation.

The HEMISPHERE® SeMSy® Setup Server Software is the central configuration software for the entire SeMSy® Video Management System. The software allows for the definition of the complete system (cameras / encoders, monitors / decoders, workstations, users, user rights, etc.). The configuration data are saved in the integrated database and made available to all connected devices and functions in real-time.

- Database for all cameras / encoders and monitors / decoders
- Management of an unlimited number of user groups and users
- Password protection for user groups and users
- Restrictions on password validity
- Assignment of administrative rights to user groups
- PTZ control priorities for user groups
- Division of encoders into different areas (area code)
- Free assignment of camera numbers
- Free assignment of camera names
- Assignment of alternative cameras
- PTZ control for Dallmeier and third-party cameras
- Management of unicast and multicast IP addresses
- Limitation of encoder availability for user groups
- Limitation of PTZ control for user groups
- Limitation of PTZ control through password
- Limitation of the playback functions for user groups
- Management of dual encoding
- Display of encoders with audio
- Management of I / O contacts
- Free assignment of decoder names
- Free assignment of IP addresses
- Free assignment of descriptions and tooltips
- Division of encoders and decoders into groups and levels
- Allocation of decoders to workstations or user groups
- Operating system Microsoft Windows¹⁾ 10 Pro 64 Bit
- Licensing with the HEMISPHERE® Site Dongle

License	
006727	DLD - HEMISPHERE® SeMSy® Setup Server Software License for the use of the setup server software with full functional range on one server (1x license for HEMISPHERE® Site Dongle)
Server	
004847	 Server Rack-Mount 1RU Server hardware, 1RU rack-mount, quad-core 3.0 GHz CPU, 16 GB DDR4 RAM, up to 4x 3.5" HDDs, 2x redundant power supplies, without HDDs, RAID 1 and license for Microsoft Windows 10 Pro included
Software	
005679	License for Microsoft Windows 10 Pro 64 Bit (IoT) IoT license for the operating system Microsoft Windows 10 Pro 64 Bit, required for operation in a virtual environment (VMware ESXi instance)
