

SeMSy® Main Server Software

HEMISPHERE® SeMSy® Main Server Software for the management of video streams of the video system in a HEMISPHERE® Security and Business Management System

The HEMISPHERE® SeMSy® Video Management System combines the proven concept of its predecessors with new dynamics and flexibility. The optimized license model with administration on the central HEMISPHERE® Backbone Server allows a simple, fast and secure adaptation and expansion of the entire system during operation.

The HEMISPHERE® SeMSy® Main Server Software is the central management software for the entire SeMSy® Video Management System. The software manages all connections, streams, monitors and states of the complete system. All required configuration data (cameras, monitors, addresses, rights, priorities, etc.) is requested from the HEMISPHERE® SeMSy® Setup Server.
