

SeMSy® Archive Server Software

HEMISPHERE® SeMSy® Archive Server Software for the backup management of recording systems in a HEMISPHERE® Security and Business Management System

The HEMISPHERE® SeMSy® Video Management System combines the proven concept of its predecessors with new dynamics and flexibility. The optimized license model with administration on the central HEMISPHERE® Backbone Server allows a simple, fast and secure adaptation and expansion of the entire system during operation.

The HEMISPHERE® SeMSy® Archive Server Software is the central software for all backups of the entire video management system. The individual backups can be defined and triggered on the various HEMISPHERE® SeMSy® Workstations. Subsequently, the HEMISPHERE® SeMSy® Archive Server requests the defined audio and video sequence from the relevant recording systems and stores it directly on the Archive Server or on a corresponding storage system.

- Simultaneous processing of up to 5 backups
- Local or network storage of the backups
- Integrated database for quick search of archived information
- Control with a HEMISPHERE® SeMSy® Workstation
- Supply of stored backups for evaluation on HEMISPHERE® SeMSy® Workstations
- Operating system Microsoft Windows¹⁾ 10 Pro 64 Bit
- Licensing with the HEMISPHERE® Site Dongle

License	
006732	DLD - HEMISPHERE® SeMSy® Archive Server Software License for the use of one archive server software with full functional range on one server (1x license for HEMISPHERE® Site Dongle)
Server	
004847	 Server Rack-Mount 1RU Server hardware, 1 RU rack-mount, quad-core 3.0 GHz CPU, 16 GB DDR4 RAM, up to 4x 3.5" HDDs, 2x redundant power supplies, without HDDs, RAID 1 and license for Microsoft Windows 10 Pro included
Software	
005679	License for Microsoft Windows 10 Pro 64 Bit (IoT) IoT license for the operating system Microsoft Windows 10 Pro 64 Bit, required for operation in a virtual environment (VMware ESXi instance)
