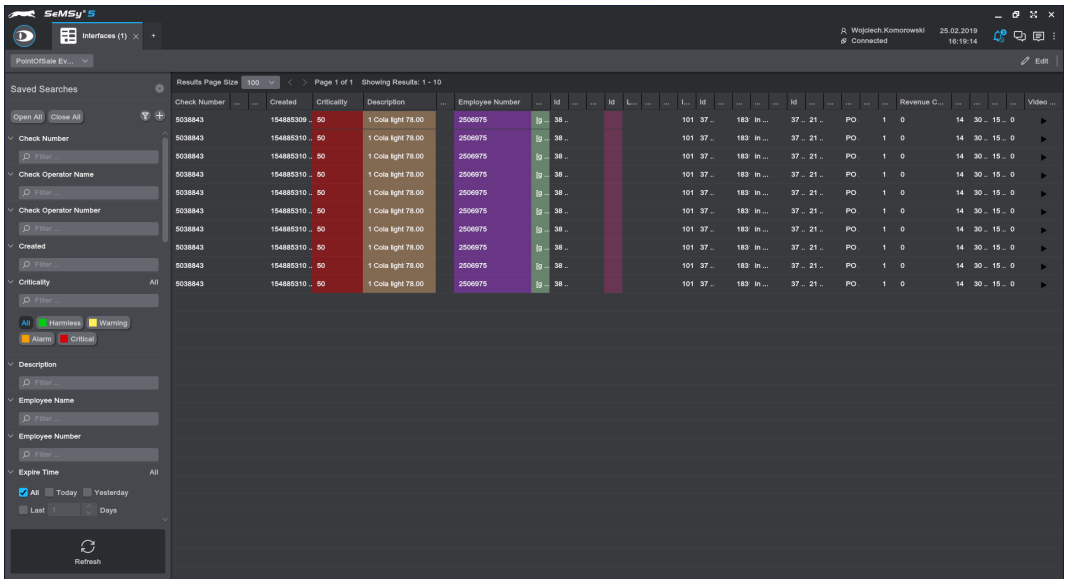
SeMSy® Interface Client Process

HEMISPHERE® SeMSy® Interface Client Process for the management of interfaces on a HEMISPHERE® SeMSy® Workstation

The **HEMISPHERE® SeMSy® Video Management System** combines the proven concept of its predecessors with new **dynamics and flexibility**. The optimized license model with administration on the central **HEMISPHERE® Backbone Server** allows a **simple, fast and secure adaptation and expansion** of the entire system during operation.



Function

The HEMISPHERE® SeMSy® Interface Client Process is used to display and evaluate data from external devices (POS systems, slot machines, card shoes, access controls, etc.) on a HEMISPHERE® SeMSy® workstation.

Universal Client

The Interface Process Client is a universal client that is available for data evaluation for all types of external devices. The user interface of a process tab can be adapted to the different device types.

Column Adjustment

The columns for displaying the various data can be adapted in number and layout to the requirements of the respective external device. Each column can have its own color.

Filtering Function

For data evaluation, a search area with extensive filter functions can be used to display exactly the data required at any time. In addition, combined filter queries can be saved as separate search options.
