

# SeMSy® Video Viewer Application

HEMISPHERE® SeMSy® Video Viewer Application for playback of local recordings on a HEMISPHERE® SeMSy® Workstation

The HEMISPHERE® SeMSy® Video Management System combines the proven concept of its predecessors with new **dynamics and flexibility**. The optimized license model with administration on the central HEMISPHERE® Backbone Server allows a **simple, fast and secure adaptation and expansion** of the entire system during operation.

## Function

The HEMISPHERE® SeMSy® Video Viewer Application enables the management and playback of local recordings. The corresponding video files (.mp4) can be viewed, renamed, deleted or further processed as events.

## Views

There are different views available for the image overview in the Image Viewer App allowing to switch between a preview, detail or list view.

## Fullscreen

The playback of a local recording is optionally done in fullscreen mode.

## Media Event

A recording can be defined as a media event and sent to a SeMSy® Event Inbox with a freely selectable criticality setting. There the video can be further evaluated as event message.

## Licensing

The license for the HEMISPHERE® SeMSy® Video Viewer Application is included in the scope of delivery of the HEMISPHERE® SeMSy® Workstation Software.
