

OVERVIEW OF ALL LOCALLY CREATED RECORDINGS

All local split recordings can be viewed in the **HEMISPHERE SeMSy® Video Viewer** application. The recordings can be played back, saved as a backup or forwarded to the **Event Inbox** as a **Media Event**.

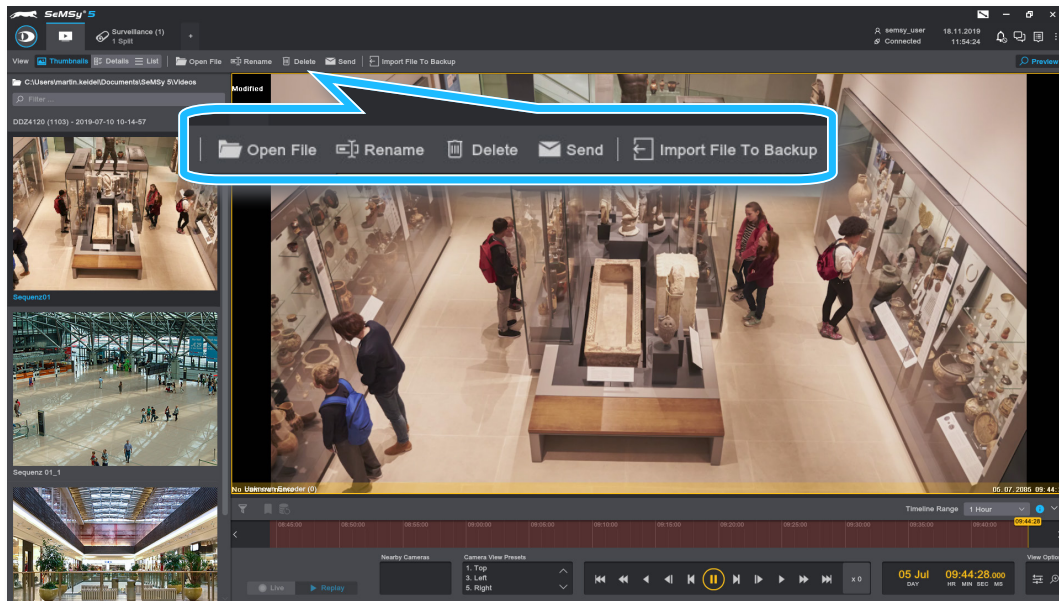

- ▶ Open the **Video Viewer** app via the launch menu.

The application is displayed:

- ▶ Select one of the options **Thumbnails**, **Details**, **List**. to customize the **View A** of the video list.
- ▶ Select a recording from the list **B** to display it on **Preview stage C**.
- ▶ Use the playback controls **D** to evaluate a recording forward or backward.

Use other functions to rename recordings or send them as a media event:

- ▶ Click **Open File** and use the file manager to select a video file that is to be loaded into the app and evaluated there.
- ▶ Click **Rename** to change the name of the video file.
- ▶ Click **Delete** to remove a video file.
- ▶ Click **Send** to display the **Media Event** dialog and submit the video file as a media event with criticality rating to the **Event Inbox** (limited to 100 MB file size).
- ▶ Click **Import File To Backup** and use the file manager to select the required video file to create it as a job in the **Backup** application and save it to the archive.
