

# SeMSy® Image Viewer Application

HEMISPHERE® SeMSy® Image Viewer Application for displaying snapshots and images on a HEMISPHERE® SeMSy® Workstation

The HEMISPHERE® SeMSy® Video Management System combines the proven concept of its predecessors with new **dynamics and flexibility**. The optimized license model with administration on the central HEMISPHERE® Backbone Server allows a **simple, fast and secure adaptation and expansion** of the entire system during operation.

## Function

The HEMISPHERE® SeMSy® Image Viewer Application provides an overview of the snapshots made on a SeMSy® Workstation. The images can be viewed, renamed, printed, exported or processed as an event.

## Views

There are different views available for the image overview in the Image Viewer App allowing to switch between a preview, detail or list view.

## Media Event

A snapshot can be defined as a media event and sent to the SeMSy® Event Inbox with a freely selectable criticality setting. There the image can be further evaluated as an event message.

## Image Editing

Snapshots can be opened directly in the SeMSy® Image Editor application for image editing or optimization.

## Licensing

The license for the HEMISPHERE® SeMSy® Image Viewer Application is included in the scope of delivery of the HEMISPHERE® SeMSy® Workstation Software.
