

# SeMSy® Layout Editor

HEMISPHERE® SeMSy® Layout Editor for the creation and editing of own split layouts and dashboards on a HEMISPHERE® SeMSy® Workstation

The HEMISPHERE® SeMSy® Video Management System combines the proven concept of its predecessors with new **dynamics and flexibility**. The optimized license model with administration on the central HEMISPHERE® Backbone Server allows a **simple, fast and secure adaptation and expansion** of the entire system during operation.

## Function

The HEMISPHERE® SeMSy® Layout Editor is used to create your own split and dashboard layouts for HEMISPHERE® SeMSy® Video Management. Split layouts are used in Surveillance tabs to connect cameras to individual split windows. Dashboards can later be configured with widgets.

## Creation

New layouts are created with horizontal columns and vertical lines. The number of these can be individually configured according to requirements.

## Cloning

Existing layouts can easily be duplicated. The layout clone can then be further edited and adapted.

## Rename

Layouts can be labeled with their own names.

## Licensing

The license for the HEMISPHERE® SeMSy® Layout Editor is included in the scope of delivery of the HEMISPHERE® SeMSy® Workstation Software.
