

VISION TOWER

THE MOBILE PLATFORM FOR FLEXIBLE VIDEO SECURITY.

FLEXIBLE
DEPLOYMENT

EFFICIENT
IMPLEMENTATION

SECURE
OPERATION

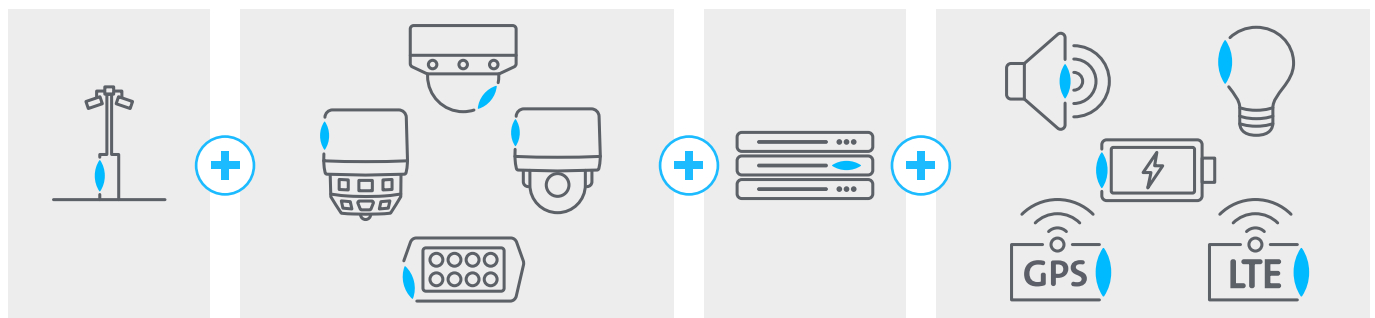

The Dallmeier Vision Tower combines proven, high-performance video technology with exceptional flexibility in a mobile security solution that can be deployed quickly and easily adapted to changing conditions.

FLEXIBLE VIDEO SECURITY FOR EVERY APPLICATION.

The Dallmeier Vision Tower system can be configured modularly and tailored to different applications and local conditions. All components are perfectly matched. Integration into existing video management systems is also straightforward.

Whether for events, construction sites or the protection of critical infrastructure, the Dallmeier Vision Tower adapts flexibly to individual requirements and enables reliable video surveillance across large areas and long distances.

MOBILE PLATFORM

Stable, flexible and quick to deploy

CAMERAS

Multifocal, single-sensor and PTZ cameras to suit local requirements

RECORDING

Reliable storage on-site or remote

EXTENSIONS

Connectivity, lighting, speakers and much more for all applications and maximum availability

FLEXIBLE.

ALWAYS THE RIGHT SOLUTION.

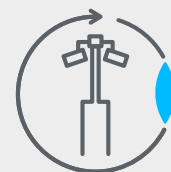

- LTE or wired
- Recording and VMS included (mobile or desktop client)
- Easy integration into existing video management systems

COST-EFFICIENT.

SAVE TIME AND COSTS.

- Fast planning and implementation
- Less permitting effort
- Reduced installation costs
- Easy adaptation to changing conditions

SECURE.

RELIABLE OPERATION.

- Cybersecurity through "Security by Design"
- Vandalism detection
- GPS protection
- Data security via VPN
- Up to 96 h battery operation

20,000 m² AREA – ONE SINGLE SYSTEM.

Whether for events, construction sites or critical infrastructure, the Dallmeier Vision Tower flexibly adapts to all requirements and provides the overview and protection needed across large areas and long distances.

800 m PERIMETER – EASY TO SECURE.

Dallmeier Panomera® S4 Perimeter delivers consistently high resolution at distances of up to 200 m. State-of-the-art AI systems enable reliable object classification and help prevent unnecessary false alarms. Combined with the Domera® SDF6900, even the immediate close range is covered seamlessly.

FEWER CAMERAS – MORE OVERVIEW ...

Panomera® works like a virtual combination of any number of PTZ cameras and multiple megapixel cameras. This allows users to cover large areas or long distances with a fraction of the cameras otherwise required – while maintaining consistent image quality across the entire object space.

- Everything in view
- Optimized video analytics directly integrated
- Reduced total cost of ownership
- Unmatched image quality

EXPERIENCE PANOMERA®
NOW!

COST-EFFICIENCY THROUGH FLEXIBILITY.

Compared with permanently installed video systems, the mobile solution requires fewer construction measures, permits and technical infrastructure. This significantly reduces planning and installation time.

The reduced need for power and network cabling further lowers effort and costs. When locations or conditions change, the system can be quickly adapted and redeployed – an economic advantage that becomes even greater with every change.

**FASTER
DEPLOYMENT**

**FLEXIBLE
PAYMENT MODELS**
