

## Local Playback Letterbox (Classic) VNB II

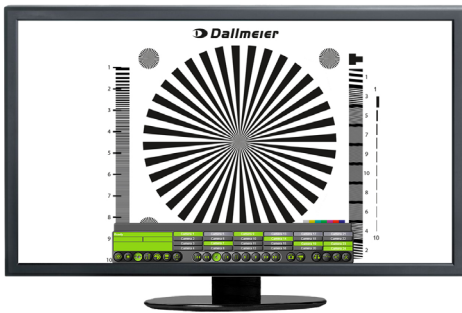

The **Letterbox (Classic)** function is a display option for the **local playback**<sup>1)</sup> of HD IP and SD IP camera recordings on a SMAVIA Appliance VideoNetBox II as of **version 8.11.5**.

The current software SMAVIA Recording Server offers **two display options**: **Fullscreen** and **Letterbox (Classic)**.

In the default setting **Fullscreen**, HD cameras are displayed filling the entire screen. The control panel is automatically shown and hidden. SD cameras, on the contrary, are displayed centered on screen. The control panel is automatically shown and hidden, as well.

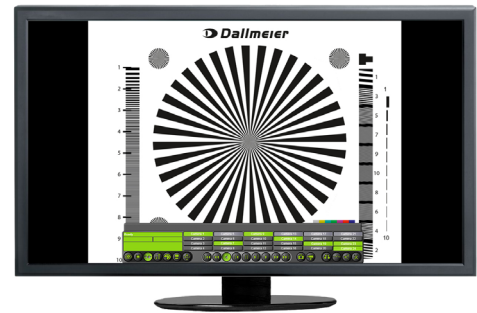

If the **Letterbox (Classic)** option is set, the playback split is smaller for both HD and SD cameras. Here, the control panel is displayed constantly.

### HD Cameras 16:9 Monitor

Display Option  
Fullscreen

### SD Cameras 16:9 Monitor

Display Option  
Letterbox (Classic)
